
This country participated in population 1, 2 & 3.

SC2CNTRY_USA_2.INF

Excluded population: All students in special education schools, and all students not in a school of one of the 50 states.

Population 3

Dates for testing program: April-May 1986.

Timing of testing program: 6-10 weeks before end of school year.

Desired target population: All students enrolled in second-year biology, chemistry, or physics classes at the time of the testing program.

Defined target population: All students enrolled in second-year biology, chemistry, or physics classes of normal schools in the 50 states during April May, 1986.

Excluded population: All students in special education schools, and all students not in a school of one of the 50 states.

Note: As the school files contains duplicate SCHOOL-id's, the data of this country & population cannot be used in matching between school data, teacher data, OTL data & student data.
